An architectural drawing is a technical drawing of a building (or

building project) that is used by architects to develop a design

idea into a coherent proposal, to communicate ideas and

concepts, to convince clients of the merits of a design, to enable a

building contractor to construct it, as a record of the completed

work, and to make a record of a building that already exists.

The target market is mostly mechanical engineers and product

design, but it's got a lot of functionality and power that anyone

would find attractive. Like many open-source products, it has a

loyal base of developers and can compete with some of the

commercial heavy hitters because of its ability to create real 3D

solids, support for meshes, 2D drafting and lots of other features.
