In the next 72 hours, Kenna may lose everything—her friends, her freedom, and maybe even herself. One kiss of the blade was all it took to get her sent to the psych ward for 72 hours. There she will face her addiction to cutting, though the outcome is far from certain. When fifteen-year-old Kenna is found cutting herself in the school bathroom, she is sent to a facility for a mandatory psychiatric watch. There Kenna meets other kids like her—her roommate, Donya, who's there for her fifth time; the birdlike Skylar; and Jag, a boy cute enough to make her forget her problems . . . for a

moment. Madeleine Kuderick's gripping debut is a darkly beautiful and lyrical novel in verse, perfect for fans of Sonya Sones and Laurie Halse Anderson. Kiss of Broken Glass pulses with emotion and lingers long after the last page. Supports the Common Core State Standards

You held off on moving to Mac OS X until your bread-and-butter applications made the jump, and now you're thinking of moving up to Tiger. This book is especially geared toward designers who've become comfortable working under Mac OS X and are ready now to make the Tiger transition. Designer and prepress pro Jeff Gamet focuses

on the Mac OS X Tiger features that matter most to illustrators, designers, and other graphic professionals. He explains not only how things work in Mac OS X Tiger, but how Tiger enables users to work efficiently and effectively. In chapters devoted to fonts, printing, PDF, color management, networking, the Mac's built-in design tools, and much more, readers will learn how to:

- * Solve the nitty-gritty issues designers confront daily *
- Improve production workflow and avoid common problems *
- Optimize, maintain, and secure your network, whether you work in a complex office environment or a small graphics studio

Educational Series
 A Pound of Flesh, Book 4 in the Surviving the Zombie Apocalypse series, picks up the day after "In Harm's Way: Surviving the Zombie Apocalypse" left off.
 Outbreak - Day1 Like a fragile house of cards in a hurricane, Presidents, Premiers, entire governments and their ruling bodies disappeared instantly. Some had ensconced themselves in deep underground bunkers or remained holed up in fortified strongholds, but history would tell that most had been swallowed up by the dead - never to be heard from again.
 WARNING - SPOILERS AHEAD
 Outbreak - Day 9 Reeling from a surprise attack, and with two fires burning out of control, Schriever AFB goes on

high alert. Former CDC Scientist Sylvester Fuentes, the apparent target, is killed along with his assistant Jessica Hanson, Brook's brother Carl and a handful of others. Destroyed in the conflagration was the Omega antiserum Fuentes had been working to perfect, and just hours prior had tested successfully on one of the newly infected. Meanwhile, returning prematurely from a mission to set off two nukes in the path of an advancing horde of living dead numbering several hundred thousand strong, and with his Delta Force commander Mike Desantos infected and dying from the Omega virus, Cade Grayson was forced to do something no friend

should have to. Then, shortly after taking Desantos's life, and while still cradling the hard charging operator's corpse, the low rumble of the two nuclear detonations signaling the mission's likely success rolled over Schriever. Immediately, Delta Force Captain Cade Grayson begins to formulate a plan that will send him hurtling on a collision course with the parties responsible for the terrorist attack. Six hundred miles away in Eden, Utah, Duncan Winters, Vietnam-era aviator, hopes to recuperate and ride out the apocalypse in his survivalist/ Domsday prepper brother Logan's compound. In Jackson Hole, Wyoming, the New American capitol

and fiefdom of Robert Christian, well-connected billionaire and self-appointed President, Daymon Bush, former BLM firefighter, bides his time with one burning desire: to find his girlfriend Heidi even if it ultimately kills him. Will Cade successfully lobby President Clay and embark on a new mission in order to extract a pound of flesh for Carl and Mike Desantos? Will Brook Grayson and her eleven-year-old daughter Raven continue to temper themselves against the new dangers inside and outside the wire at Schriever? Will Daymon accomplish his goal and survive Jackson Hole? Can the much older Duncan find a way to fit in with his younger brother

Logan's prepper friends? Will newly promoted General Ronnie Gaines fit in with the late Commander's fractured Delta team? Can the human race find a way to survive the legions of migrating zombies?

The popularity of The Seven Deadly Sins dates back to the 4th Century. They enjoyed tremendous notoriety during the period we call the Middle Ages. While the popular assortment of sins is not directly from scripture, they have been the subject of many a sermon, lecture, writing and art. In his book *The Seven Deadly Sins: And Why We Love Them*, Steinbacher examines each in detail. He gives examples of how they effect us and how we conduct ourselves in this world. Included in this book is Steinbacher's essay, An

Angel In My Garden.

Analyzing the Music of Living Composers (and Others) is a collection of essays that grew out of the 2010 annual meeting of the West Coast Conference of Music Theory and Analysis. The stated purpose was to apply traditional music-analytic techniques, as well as new, innovative techniques, to describing the music of composers of the late 20th and early 21st centuries. The goal was to take steps toward making the music of our time a bit less impenetrable for our colleagues, students and other listeners by showing how it follows, varies, and sometimes controverts the organizational schemes

of older music. This collection includes chapters analyzing music of older eras as well, including a number that throw light on the analysis of recent music in unexpected ways, and there are also several chapters that propose innovative analytic approaches to recent popular music and jazz. Stories Penguin Data Collection Data Collection is the second of six books in the Measurement and Evaluation Series from Pfeiffer. The proven ROI Methodology--developed by the ROI Institute--provides a practical system for evaluation planning, data collection, data analysis, and reporting. All six books in the series offer the latest tools, most current research, and practical

advice for measuring ROI in a variety of settings. Data Collection offers an effective process for collecting data that is essential to the implementation of the ROI Methodology. The authors outline the techniques, processes, and critical issues involved in successful data collection. The book examines the various methods of data collection, including questionnaires, interviews, focus groups, observation, action plans, performance contracts, and monitoring records. Written for evaluators, facilitators, analysts, designers, coordinators, and managers, Data Collection is a valuable guide for collecting data that are adequate

in quantity and quality to produce a complete and credible analysis.

Environmental devastation, a significant consequence of industrial activity in Soviet times, continues to be a major problem in Russia. Specific problems include radioactive pollutants from inadequately monitored nuclear plants, illegal logging and wildlife poaching which have grown into hugely profitable businesses for criminal gangs, and toxic waste from unsanctioned and poorly controlled metallurgical, petroleum and

agricultural chemical industries. This book presents a wide ranging assessment of the environmental problems faced by Russia and of the crime and corruption which contribute to them. It also discusses the attitude of the Russian government which seems to view environmental protection as something for rich countries, something to be postponed until Russia is on the same economic footing as wealthier Scandinavian and western European countries. It concludes, gloomily, that the problems are getting worse and that little is being done to tackle them.

"Daemon in the Sanctuary" explores the uncanny contradiction between the phenomenological experience of home as a site of nurture and security and the empirical reality that people are far more likely to be hurt and even killed in their own homes by their intimates, rather than at the hands of strangers. Moving from the syrupy tributes of the god of love in Plato's "Symposium" to the subject of domestic violence appears to be a giant leap, but he author shows that embroidered romantic ideas about love prepare the initiate poorly for the reality of intimate connection. Poets and philosophers who lead us to believe

that love is heaven sent can leave us craving an extreme experience. We crave an earth-shaking, life-altering intrusion on our tranquility as evidence that love is real. Thus the naive initiate can easily mistake the flutter of the pulse, the quickening of the heart rate, the flush, the confused emotions, and the painful longing as signs of the god's gift. But these are also the signs of fear!

Wendy C. Hamblet, a philosopher in the phenomenological lineage, examines the truth value of phenomenological experience, through the lens of the problem of intimate violence. If Husserl is right and phenomenological method provides the ground of all empirical

truth, then what is to be made of the fundamental contradiction between the lived experience of home as a site of nurture and security and of intimates as guardians and caretakers, and the empirical fact, evident in every human society, that people are far more likely to be harmed, and even killed, in their homes or in the homes of their intimates and at the hands of those charged with their care?

Hamblet carefully choreographs a dance between the two opposing 'truths' to expose how the lived sense of home, colored by ideals, can tint people's expectations about intimate connection and cloud their ability to recognize the signs of

intimate abuse. This book illuminates the dangers and pitfalls of unhealthy intimacy and offers a regimen for loosening the grip of a sickened love's pathological hold.
