Cannabis Culture Hope

Of all the plants men have ever grown, none has been praised and denounced as often as marihuana (*Cannabis sativa*). Throughout the ages, marihuana has been extolled as one of man's greatest benefactors and cursed as one of his greatest scourges. Marihuana is undoubtedly a herb that has been many things to many people. Armies and navies have used it to make war, men and women to make love. Hunters and fishermen have snared the most ferocious creatures, from the tiger to the shark, in its herculean weave. Fashion designers have dressed the most elegant women in its supple knit. Hangmen have snapped the necks of thieves and murderers with its fiber. Obstetricians have eased the pain of childbirth with its leaves. Farmers have crushed its seeds and used the oil within to light their lamps. Mourners have thrown its seeds into blazing fires and have had their sorrow transformed into blissful ecstasy by the fumes that filled the air. Marihuana has been known by many names: hemp, hashish, dagga, bhang, loco weed, grass—the list is endless. Formally christened *Cannabis sativa* in 1753 by Carl Linnaeus, marihuana is one of nature's hardiest specimens. It needs little care to thrive. One need not talk to it, sing to it, or play soothing tranquil Brahms lullabies to coax it to grow. It is as vigorous as a weed. It is ubiquitous. It flourishes under nearly every possible climatic condition.

What exactly happens when you get stoned? Why does your mouth dry up and why do you become so interested in food and sex? Why can some people work when they're stoned and others

can't? What are the tobacco companies' plans for exploiting the potential legal market? How come there's so much cannabis found in prisons and how does it get there? Who brings it across national borders? CANNABISCULTURE answers all these questions and more. Thirty years after THE TIMES ran an advertisement calling the law against cannabis 'immoral in principle and unworkable in practice', the drug's legalisation has become a live political and social issue. But there is surprisingly little information available on the drug: from its medicinal properties to its function as a commodity which is traded on a global scale, its role in various religions to the many ways in which it can be cultivated and its effect on the body and mind.

Whether you want to grow 3 plants or 30,000 there are many factors to take into consideration: Would you rather grow a strain that produces 38g per season or one that yields 9 Kilos? Would you rather grow a strain that has a high incidence of unwanted side effects (Anxiety, paranoia, headaches, etc.) or one that has a very low incidence of said effects? Do you want to grow a strain that has a 29%THC level or one that has 5%THC? One that has 0%CBDs or one that has 47%CBDs. Would you like to know which strains are almost totally immune to powdery mildew, fungus and mold or one that is particularly vulnerable to these diseases? One that can grow clear into the snows of Fall or one that needs a Mediterranean climate to thrive? Do you want to grow a strain that produces particularly well under indoor lighting or one that requires an outdoor grow to thrive? A strain that reach only 18" to 24" tall or one that grows to 12 feet? A strain that needs little water or one that requires a good deal of water? Then there are

strains that absolutely must have a good deal of support and those that require none at all. Strains that take 20 weeks of flowering (After a long vegetative period) and strains that go from seed to harvest in 28 days. Interested in the medical conditions a given strain is good for? Here you can find over 120 medical conditions are listed among over 500 strains. There are even strains with near zero THC and over 42% CBDs for medical use with no high whatsoever. There are strains that have an intense odor when growing and will alert anyone within several hundreds of yards and there are strains with little odor or even an aroma that smells like something different than marijuana altogether. If you think you are going to get this information in one place - you are right. It is this book. Other than that, I hope you have thousands of hours to read many dozens of books AND search hundreds of web sites. That is what I did for the last two years. These are the results. This is NOT a book strictly about horticultural practices for marijuana in general (though you will find brief comments and an excellent all around organic bug and disease control spray menu herein). If you want in depth general marijuana horticultural information there are many sources easily available. George Servantes is one of the best and there are countless videos on You Tube for such information. This book is completely about STRAINS, what they need to grow, how they grow best, and every aspect about each strain.. You will find it invaluable.
